

## **Oxford YASA Motors Selected to Present at CleanEquity Monaco 2011**

**Oxford YASA Motors** has been selected to present at CleanEquity Monaco 2011, the foremost event for next generation clean and green technology. The conference is on March 3<sup>rd</sup> & 4<sup>th</sup> at the Sporting d'Hiver, Monaco.

**Oxford YASA Motors** is part of an expert selection of the world's most inspiring cleantech companies chosen to present to invited industry-specific senior financial and strategic investors, policy makers, legislators, end users and media.

**Oxford YASA Motors** is a dynamic young business, ideally positioned to become a leading provider of advanced electric motors and generators. The YASA motor offers the highest torque-to-weight ratio available on the market in a versatile package that can be manufactured easily and cost-effectively in volume.

The global electric motor market is vast with a growing demand for light, high-torque and efficient motors such as the highly scalable YASA motor. Electric motors of various types are used in numerous applications across numerous markets including Automotive (and broader Transportation), Renewable Energy, Aerospace, Defence and Industrial.

A global drive to find more efficient, compact and powerful motors and generators is providing the opportunity for OYM to break into high-growth markets and establish credibility through world-class people, innovative products, strong customer focus and outstanding intellectual property. The company has built a strong track-record since formation, achieving sales revenue in its second month of operation and continuously thereafter, with production capacity and order-book growing quickly.

Accelerated growth plans have been defined and CleanEquity Monaco will be a key element of strategic fund raising efforts during the next few months.

Innovator Capital, a London specialist investment bank, hosts the annual invitation-only event. CleanEquity Monaco's regional host is the Monaco Chamber of Economic Development.

Other local partners include Prince Albert II of Monaco's Foundation, the Monte Carlo SBM, and the Stelios Philanthropic Foundation. Collaborators for the 2011 event include Covington and Burling LLP, PR Newswire, Invest Securities, 21 Ventures, Biocode Incubation and the UNEP Fi.
